

Model DYCZ-23A

Feature

- The single slab structure with leveling base;
- The main tank body is made of high quality transparent polycarbonate, exquisite and durable, easy for observation;
- Molded buffer tank equipped pure platinum electrodes with high conductivity;
- Easy and convenient to load samples;
- Upper and lower tank structure, save buffer solution;
- Spacer sets are offered in thicknesses of 1.0mm, 1.5mm;
- 10 wells and 15 wells combs with the teeth thickness of 1.0mm and 1.5mm;
- Four clamps help to clamp glass plates with main tank body;
- Special design of the tank avoid buffer and gel leakage.

Application

For SDS-PAGE, Protein electrophoresis

Specification

Dimension (LxWxH)	140×125×155mm
Gel Size (LxW)	100×80mm
Comb	10 wells and 15 wells
Comb Thickness	1.0mm and 1.5mm
Number of Samples	10-15
Buffer Volume	350 ml
Weight	1.0kg

Recommended Power Supply: DYY-6C/6D/8C/10C
