

## Model DYY-8C

### Feature

- Micro-computer processor intelligent control;
- Able to adjust parameters in real time under the working condition;
- LCD displays voltage, electric current, timing time;
- With automatic memory function, able to store the operation parameters;
- Able to work with constant voltage, constant current, constant power and automatically switch program according to the pre-set parameters for different needs;
- Protection and warning function for unloaded, overload, sudden-load change.

### Application

For general protein, DNA, RNA electrophoresis

### Specification

Dimension (LxWxH)	315 x 290 x 128mm
Output Voltage	5-600V
Output Current	2-200mA
Output Power	120W
Output Terminal	2 pairs in parallel
Weight	5.0kg
